

Vote by mail envelope templates

Labels for sending ballots between counties

Use this label template to forward any ballot envelopes that end up in your office, but belong to a different county.

About this template:

- This is not a one-size-fits-all template. Our goal was to give you a starting point that you can customize to work with your policies and practices.
- If the county's envelopes use a color other than purple on their return envelopes, change the color of the label to match. This helps USPS recognize the envelope and get to the right county's office.
- Print these this template using a full sheet label. Then cut in half.

We're always here to help! Get in touch at hello@civicdesign.org.
